Re: Docket No. 98N-1038 Irradiation in the Production, Proces-
sing, and Handling of Food

Dear Mr. President,

Thank you for doing your best!!

I don't want to eat irradiated foods in any form. At the
very least, these foods should be prominently labeled, and all
irradiated components of a food should be identified.

Best Regards,

Robert Lee Bryan

Re: Docket No. 98N-1038
Irradiation in Production, Processing
and Handling of Food

To whom it may concern:

I recommend labeling irradiated foods:
"or any foods containing ingredients that
have been treated by irradiation, should be
labeled with a written statement on the
principal display panel The statement
should be easy to read and clearly displayed
[if the food is unpackaged]..."

The requirement for irradiation disclosure
(both label and radura) should not expire
at any time in the future. ["treated by irradiation"]

I feel irradiation mutates or destroys
natural enzymes that may benefit digestion
and optimum body mass. If there is
no label, I will be misled into believing
the food has not been irradiated.

I urge you to place the comments
received received on the Internet. *Robert L. Bryan*
